# Mobile 288-core ground-mounted optical cable distribution box

## Overview

The OHC 288 houses 48 feed/pass-thru adapters and 288 distribution adapters for fiber distribution to high density buildings with many potential subscribers. OHC are constructed from powder-coated aluminum that is both durable and lightweight. The unit can be quickly installed by a. Optical Hub Cabinets (OHC) provide fiber distribution to subscribers from a compact, environmentally protected outdoor terminal. IP65-rated, high-density solution for reliable, scalable network deployments. Compliant with IEC, TIA/EIA & RoHS standards. The Fiber Distribution Hubs MDP EL 144/288 and MDP EL 288/576 are designed to store up to 576/1,152 splices and to terminate up to 192/384 fibers with SC connectors or 384/768 fibers with LC connectors using the FibeRoad TM. A fiber distribution cabinet (FDC) is an enclosure used to house and manage fiber optic cables and related equipment. FDCs are typically installed in outdoor settings, such as on the side of a building or in an underground vault, and are used to distribute fiber optic cables to multiple buildings. FSP-FDC-S3-288A Fiber Distribution Cabinet is used for connecting, allocation and dispatching of communication optical cables to each optical distribution node, providing safe, reliable and flexible management equipment of optical fiber and cable for telecommunication network.
