Namibian Transimpedance Amplifier QSFP

Overview

The MATA-40734/36 consumes very low power, typically 300mW, allowing it to be used in high density optical interconnect solutions. Features include RSSI for photo-alignment and power monitoring, and I2C control of Bandwidth, Output Amplitude, Peaking, Loss of Signal (LOS), Gain and. Tlaletso Global Photonics (TGO) designs and manufactures laser diodes, VCSEL, DFB lasers, laser drivers, CDR circuits, optical modulators, TIAs, co-packaged optics, silicon photonics, linear drive plu. 6T. Explore technical resources about optical communication solutions, structured cabling, ODN design, optical modules, fiber testing, data center networks, base station energy, smart city platforms, and. Ideal for short reach optical. Additional LC parasitics are present in packaged devices due to wirebonds, etc. Non-zero amplifier time constant can actually increase TIA bandwidth!! must decrease quadratically! If we integrate the output noise, the upper bound isn't too critical. Often this is infinity for derivations, or 2X. This QSFP-DD dual pluggable EDFA booster amplifier offers a optical input range and provides a +20dB nominal gain to a C-Band DWDM link.
