Optical Module xg10g

Overview

10 Gbps optical transceiver module designed for the Fiber OLT XGS. CLASS 1 LASER PRODUCT, IEC/EN 60825-1:2014 - Do not look into the ends of the fiber/optical cable or the SFP module while the converters are powered. Applicable to data center and campus networks, enabling cost-effective, efficient, and high-speed interconnection As an industry-leading ICT infrastructure and industry solution provider, Ruijie offers customers a wide variety of high-density and low-power 10G optical modules. They are applicable. If the SFP-10G-ER-1310 is connected to a 10Gbase-ER standard optical module (1550nm, 10GE, 40km), the maximum transmission distance is only 20km due to different specifications such as wavelength and receiving sensitivity. Integrated circuits and reference designs help you create a smaller and faster optical module design used in high-bandwidth data communication applications. The module could implement DDM function.

10GE SFP+ Optical Modules

Single-fiber bidirectional (BIDI) optical modules must be used in pairs. For example, SFP-10G-BXU1 must be used with SFP-10G-BXD1.
