Optical cable with aluminum tube

Overview

Aluminum tube OPGW: optical fibers are placed loosely in plastic tubes embedded in a hermetically sealed aluminum tube. The aluminum tube is surrounded by single or double layers of metallic wires. Material and structure are uniform with good resistance to corrosion. ●Good anti-corrosion performance and good anti-lightning performance. ●Short circuit. ZTT OPGW is mainly divided into: central-type stainless steel tube OPGW, stranded-type stainless steel tube OPGW, al-covered stainless steel tube OPGW, aluminum tube OPGW, lightning resistant central stainless steel tube OPGW with compressed wires and OPPC. Self-support Aerial installation 1. Designed to withstand mechanical strain from weather conditions like wind and ice, the OPGW ensures the safe. This 48-fiber indoor/outdoor cable utilizes Corning SMF-28 Ultra optical fiber, housed within a robust aluminum interlocking armor construction.
