Optical modules supported by Huawei MA5675M

Overview

Huawei SmartAX MA5675 Support Guide, Manuals & PDF – HuaweiSmartAX MA5675: Access product manuals, HedEx documents, product images and visio stencils. Huaw.

Key Takeaways

The Huawei MA5675M supports Class C+ GPON optical modules with SC/UPC connectors, providing up to 30 km coverage and a maximum splitter ratio of 1: 128.

Optical Interface and Module Type

The MA5675M is an indoor GPON ONU designed for SOHO and SME users. It features a single GPON uplink port that connects to the OLT using a Class C+ optical module, which allows for extended reach and high splitting capacity. The optical connector type used is SC/UPC, ensuring compatibility with standard GPON fiber cabling.

Coverage and Splitter Ratio

Maximum coverage distance: 30 kmMaximum splitter ratio: 1: 128 This makes the MA5675M suitable for both small office and medium enterprise deployments, supporting multiple users over a single fiber line.

Deployment and Connectivity

The MA5675M provides multiple service ports on the LAN side, including 4 GE ports, 4 POTS ports, and Wi-Fi, enabling triple-play services (voice, data, and video) for end users. The device supports TR-069, OMCI, and OAM management modes, allowing remote configuration and monitoring without additional IP network deployment.

Summary

In practice, when deploying the MA5675M: Use SC/UPC GPON optical modules compatible with Class C+ specifications. Ensure fiber links do not exceed 30 km and adhere to the 1: 128 splitter ratio limit. The device supports standard GPON management and monitoring protocols for easy maintenance and service provisioning.

This configuration ensures reliable GPON connectivity and optimal performance for enterprise and SOHO environments.
