Paraguay Fireproof Cable Tray Trough Type

Overview

Since 1982, VALDINOX has been designing and manufacturing wire mesh cable trays, supports, and easy-installation accessories. Since then, we have dedicated all our experience and technical...

Key Takeaways

Trough type fireproof cable trays in Paraguay offer up to 90 minutes of fire resistance, fully enclosed protection, and durable steel construction suitable for critical applications.

Product Overview

Trough type fireproof cable trays are designed to protect electrical cables in high-risk fire environments. They feature a fully enclosed trough design with a matching cover, which prevents flame spread and safeguards cables during emergencies. These trays are ideal for commercial buildings, hospitals, data centers, and underground projects in Paraguay and other regions (WJ Qiaojia).

Key Features

Fire Resistance: Meets international fire safety standards, with a fire resistance rating of up to 90 minutes, ensuring reliable protection in high-fire-risk areas. Material: Constructed from Q235 steel with an eco-friendly fire-retardant coating, providing durability and environmental safety. Customization: Available in various sizes and can be combined with galvanization or powder coating for enhanced corrosion resistance.

Structure: The trough design allows for comprehensive cable protection, supporting straight sections, bends, tees, and four-way components for complex installations. Applications: Suitable for industrial, commercial, and residential projects, including large office buildings, financial centers, and pipe galleries.

Suppliers and Availability in Paraguay

Several suppliers provide fireproof cable trays suitable for Paraguayan projects: WJ Qiaojia: Offers high-quality steel trough type trays with fireproof coatings and customization options. Brilltech Engineers Pvt. Ltd.: Supplies durable cable trays in Paraguay, including galvanized steel, stainless steel, and fiberglass options, with installation support and system design assistance.

Eurotray and European Manufacturers: Provide customized fireproof mesh and trough cable trays with international shipping options to Paraguay.

Installation and Benefits

Easy Installation: Trough trays can be installed independently or attached to building structures and pipe gallery supports. Cable Safety: Protects cables from physical damage, dust, and environmental hazards, extending cable lifespan. Fire Safety Compliance: Ensures adherence to national and international fire safety standards, critical for high-risk areas.

Space Optimization: Fully enclosed design allows for efficient cable management in areas with limited space. Trough type fireproof cable trays are a reliable solution for enhancing fire safety and cable management in Paraguay, combining durability, fire resistance, and flexibility for complex installations.
