Pigtail tied too tightly

Overview

It happens when you pull your hair too tightly or wear hairstyles that pull on the scalp, like braids, weaves, ponytails, or extensions. Over time, this tension on the hair can cause damage to the hair follicle, leading to broken hair, thinning edges, and even permanent. Pulling, tugging, or twisting your hair too often might seem harmless, but over time, it can lead to hair loss. Many people don't realize that tight hairstyles and constant tension on their hair can cause a type of hair loss called traction alopecia. At HairClub, we've helped thousands of people. Pigtails and ponytails are great when you're in a hurry, but they're hard on your hair! Here are 5 mistakes to avoid if you want to avoid damaging your hair when you're tying it up. Hair is 95% keratin—a fibrous protein that's also found in your nails and skin. What are the risks associated with tight hairstyles and what are the solutions. Hair ties are a daily essential for most females, whether they're heading to the gym, working from home, or styling a slick back bun. But what if something as harmless-looking as a hair tie is secretly damaging your hair?

According to dermatologists and trichologists, the improper use of hair.
