Price List for Plastic Fiber Optic Patch Cords Spot

Overview

Fiber Patch Cord Types Prices & Technical SpecificationsIn summary, a fiber patch cord is a type of fiber optic cable that is used to connect Plastic Optic.

Key Takeaways

Plastic fiber optic patch cords typically range from $10 to $50 per unit, depending on length, connector type, and quality. Plastic optical fiber (POF) patch cords are designed for short-distance, high-speed data transmission using a durable PMMA plastic core with fluorinated polymer cladding, making them flexible and easy to handle. Prices vary based on several factors: 1.

Length and Connector Type: Shorter cords (1–3 meters) with standard connectors like LC or SC usually cost around $10–$20, while longer cords or specialized connectors can reach $30–$50. 2. Quality and Testing: High-quality cords with low insertion loss, return loss testing, and certified performance may carry a premium.

OE

M or custom-labeled cords may include setup fees, adding $30–$100 for small orders, though bulk purchases reduce unit cost. 3. Jacket and Armoring: Cords with LSZH jackets or armored protection for industrial or harsh environments are more expensive due to added durability.

4. Bulk Orders: Purchasing in bulk from manufacturers or wholesalers can significantly lower the per-unit price. Wholesale suppliers offer factory-direct pricing for large quantities, often with fast shipping and quality guarantees.

Applications: Plastic fiber optic patch cords are ideal for plug-and-play setups, industrial control systems, local office networks, and residential multimedia systems due to their large core diameter, reduced attenuation, and simplified alignment. In summary, for standard short-distance plastic fiber optic patch cords, expect $10–$50 per cord, with higher prices for longer lengths, specialized connectors, or enhanced durability. Bulk orders and OEM options can reduce costs per unit while providing customization.
