Price list for 288-core fiber optic cable

Overview

Discover premium quality 288 core optical fiber cable price designed to enhance connectivity and performance. Ideal for business buyers seeking reliable solutions.

Key Takeaways

The average price for a 288-core fiber optic cable ranges from approximately $8. 21 per meter for standard ADSS outdoor cables to higher prices for specialized or pre-terminated assemblies.

General Pricing Overview

Standard Outdoor ADS

S 288-Core Cable: Around $8. 21 per unit for bulk orders, suitable for direct burial and outdoor installations, offering durability and long-distance transmission capabilities (Alibaba). OEM/Pre-Terminated 288-Core Cables: Prices vary depending on customization, ribbon fiber design, and pre-terminated assemblies.

OE

M suppliers in China offer competitive pricing due to cost-efficient sourcing of premium glass preforms, with exact quotes provided upon discussion with sales teams (Fibermtp).

American-

Made ADS

S and Ribbon Cables: U. S. distributors like American Tech Supply provide 288-core ADSS cables with delivery in less than 7 weeks. Pricing is competitive but may be higher than Chinese imports due to domestic manufacturing and compliance with Telecordia and UL standards (American Tech Supply).

Specialized OS

P Cables: Corning ALTOS® Lite and TeraSPEED® 288-core cables for campus backbones or FTTH deployments are available in single or double-armored, gel-free, and loose tube designs. Prices depend on length, fiber type (SMF-28, G. 652.

D, G. 657. A1), and jacket configuration (GoGoFiber).

Factors Affecting Price

Cable Type: Single-mode (SMF) for long-distance vs. multimode (MMF) for shorter distances. Armoring and Jacket: Armored or double-jacketed cables cost more due to enhanced durability.

Pre-

Termination: Factory-terminated MTP/MPO assemblies increase cost but reduce installation time. Bulk Orders: Larger quantities often reduce per-unit cost. Supplier Location: Chinese manufacturers typically offer lower prices, while U.

S. suppliers may provide faster delivery and compliance with local standards.

Recommendations

For high-volume outdoor installations, standard ADSS 288-core cables at ~$8. 21 per meter are cost-effective. For data centers or metropolitan networks, consider pre-terminated ribbon fiber cables for faster deployment, with pricing obtained directly from OEM suppliers.

Always verify fiber type, armoring, and compliance standards to match your network requirements. This pricing overview provides a starting point for procurement, but contacting suppliers directly is recommended to obtain exact quotes based on length, type, and delivery location.
