Price list of Japanese aluminum galvanized cable trays

Overview

Cable Tray Price List Find reliable cable tray price lists from trusted suppliers. Shop high-quality, customized, and affordable options for your electrica.

Key Takeaways

Aluminum galvanized cable trays typically range from $20 to $50 per meter, depending on type, size, and coating, with bulk orders potentially reducing costs.

Pricing Factors

The cost of aluminum galvanized cable trays is influenced by several factors: Material: Aluminum is lightweight and corrosion-resistant, making it more expensive than standard galvanized steel, but ideal for rust-prone environments. Surface Treatment: Hot-dip galvanization (HDG) provides superior corrosion protection and durability, increasing the upfront cost compared to pre-galvanized trays. Tray Type: Ladder trays are more expensive than perforated or wire mesh trays due to higher material usage and load capacity.

Dimensions: Wider and taller trays require more material, raising the price per meter. Order Quantity: Bulk purchases can reduce costs by 20–40%. Regional Factors: Importing from Japan or other countries may affect shipping and labor costs, influencing the final price.

Typical Price Range

Aluminum trays: $20–$50 per meter, depending on size, coating, and type. Galvanized steel trays: $10–$30 per meter, generally cheaper than aluminum but heavier. Fittings and accessories: Coupler plates, bends, and tees are priced per piece, typically ranging from $1–$5 for small sizes, with larger fittings costing more.

Cost-

Saving Tips

Consider perforated trays instead of ladder trays if weight is not critical, which can save 10–15%. Bulk ordering and negotiating long-term supply contracts can significantly reduce unit costs. Compare suppliers for Japanese imports vs local alternatives, as importing may reduce material costs but increase shipping expenses.

For exact pricing, it is recommended to contact Japanese suppliers directly or request a quotation with your project specifications, including tray type, dimensions, and quantity, to obtain the most accurate and up-to-date cost.
