Price of 45-degree horizontal cable trays

Overview

The Eaton B-Line series 4A-12-45HB24 is a 12-inch wide, 45-degree horizontal bend designed for reliable cable routing within commercial and industrial cable tray systems.

Key Takeaways

The price of a 45-degree horizontal cable tray bar varies by material and supplier, with steel versions available at ₹450 per piece and aluminum versions requiring supplier-specific quotes.

Steel Cable Tray Bar

A steel ladder horizontal bend cable tray with a 45-degree angle, 100 mm width, 50 mm height, and 3 mm thickness is priced at ₹450 per piece from Efra Industries LLP in Surat, Gujarat, India. This option is suitable for moderate to smaller cable bundles and provides strong mechanical durability for industrial installations.

Aluminum Cable Tray Bar

Aluminum 45-degree horizontal cable tray bends, such as the B-Line (Eaton) 6A18-45HB24 or the 12-inch wide 4A-12-45HB24, are available from suppliers like Graybar and Tremtech. These fittings are lightweight, corrosion-resistant, and compatible with ladder-type cable trays. Exact pricing for aluminum versions is not listed online and typically requires entering your location or contacting the supplier directly for a quote.

Aluminum bends are ideal for commercial and industrial applications where corrosion resistance and ease of installation are important.

Key Considerations

Material: Steel is more cost-effective and strong, while aluminum offers corrosion resistance and lighter weight. Dimensions: Ensure the width, height, and bend radius match your existing cable tray system. Supplier: Prices vary by region and supplier; contacting the vendor directly is recommended for aluminum versions.

Compliance: Aluminum bends often comply with NEMA Class 12B standards and UL/CSA/CE certifications. For purchasing, you can request quotes from suppliers like Graybar, Tremtech, ReflowX, or local manufacturers depending on your location to get the most accurate pricing and delivery options.
