Price of Asian Cable Tray Cover Plate Making Machine

Overview

"Cable Tray Machinery Price" For a factory well-versed in providing OEM solutions, prices typically start around $40,000 and go upwards depending on comple.

Key Takeaways

The price of a cable tray cover plate making machine from Asian manufacturers typically starts around $40,000 and can increase depending on customization, automation, and production capacity.

Price Range and Factors

Asian suppliers, particularly from China, offer cable tray cover plate making machines at factory prices starting from approximately $40,000, with higher-end models costing significantly more depending on features and complexity. Factors influencing the price include: Automation level: Fully automatic roll forming lines with PLC control, frequency conversion speed regulation, and integrated punching, notching, and cutting systems are more expensive than semi-automatic or manual machines. Production capacity: Machines capable of handling larger coil widths, higher tonnage, or faster production speeds command higher prices.

Customization: OEM solutions tailored to specific tray dimensions, thicknesses, or material types can increase costs. Technical features: Inclusion of hydraulic systems, decoilers, leveling devices, and advanced control systems adds to the price.

Typical Machine Features

Roll forming system: Converts sheet metal into engineered cover plate shapes continuously. Punching and notching: Integrated in-line operations reduce secondary labor and improve efficiency.

Hydraulic and PL

C control: Ensures precise operation, automatic coil feeding, and consistent product quality. After-sales support: Many suppliers provide installation, training, and technical support, which may involve additional costs for travel and accommodation.

Supplier Options

Alibaba and Made-in-China platforms list multiple manufacturers offering cable tray cover plate making machines with varying specifications and prices. Specialized factories provide high-efficiency machines for wire mesh welding and roll forming, often with the option to customize tooling for different cover plate profiles. Jinggong and Xinnuo are examples of manufacturers offering automatic production lines with full PLC control and integrated operations, suitable for large-scale production.

Recommendation

For accurate pricing, it is advisable to request a detailed quote from suppliers, specifying: material type, tray dimensions, production speed, and automation requirements. This ensures the price reflects the exact configuration needed for your production goals.
