Price of Bedroom Fiber Optic Splice Box

Overview

Explore a wide range of our Fiber Splice Box selection. Find top brands, exclusive offers, and unbeatable prices on eBay. Shop now for fast shipping and easy returns!

Key Takeaways

The price of a bedroom or indoor fiber optic splice box typically ranges from $20 to $100, depending on capacity, connector type, and features.

Overview

Fiber optic splice boxes, also called splice enclosures or termination boxes, are used to protect and manage spliced fiber optic cables, ensuring proper organization, strain relief, and environmental protection. For residential or bedroom use, compact wall-mounted boxes are most common, often supporting 4–12 fibers with LC or SC connectors. These boxes are suitable for indoor installation and sometimes rated for light outdoor use.

Price Range

Small indoor wall-mounted boxes: $20–$50, typically supporting 4–6 fibers with basic LC or SC adapters. Medium-capacity boxes: $50–$80, supporting 12–24 fibers, often with removable splice trays and better cable management. High-end or fully equipped boxes: $80–$100+, including pre-installed splice cassettes, multiple connector types, and IP-rated protection for more demanding environments.

Additional Considerations

Connector type: LC, SC, ST, or E2000® connectors affect price.

LC and S

C are most common for home networks. Capacity: More fibers and splice trays increase cost. Installation accessories: Some boxes include mounting hardware, while others may require separate purchase.

Shipping: Domestic shipping may be free for orders above a certain value, while international shipping can add $20–$25 or more. For a typical bedroom setup, a compact wall-mounted splice box with 4–6 fibers and LC connectors is usually sufficient and can be purchased for around $25–$40, including basic mounting accessories.
