# Price of Indoor 12-Core Single-Mode Fiber Optic Cable

## Overview

Shop products from small business brands sold in Amazon''s store. Discover more about the small businesses partnering with Amazon and Amazon''s commitment to empowering them. Learn more.

## Key Takeaways

The price of a 12-core single-mode indoor fiber optic cable typically ranges from $1. 50 to $3. 50 per foot, depending on specifications, jacket type, and supplier.

### Pricing Overview

Lanshack offers plenum-rated 12-strand indoor single-mode fiber optic cable, suitable for multi-floor deployments and headend terminations, with pricing generally around $2–$3 per foot for standard indoor plenum cables, though exact pricing may vary based on length and shipping. Alibaba lists 12-core single-mode fiber optic cables for bulk orders, with prices ranging from $1. 50 to $2.

50 per foot for standard indoor cables, depending on the manufacturer, jacket type (PVC, LSZH), and order quantity. Weichuang Optics provides customizable 12-core indoor fiber optic cables with flame-retardant jackets and aramid yarn reinforcement. Pricing is typically quoted per kilometer, with a minimum order quantity of 1 km, which can translate to roughly $1.

80–$2. 50 per foot for standard single-mode indoor cables. WireAndCableYourWay offers Prysmian 12-strand indoor/outdoor single-mode riser-rated cables, with pricing available upon request, generally in the same range as other high-quality indoor cables, depending on plenum or riser rating and additional features like water-blocking or UV resistance.

### Factors Affecting Price

Jacket Type: Plenum-rated (CMP) cables are more expensive than riser-rated (CMR) or standard PVC jackets due to fire safety compliance. Length and Quantity: Bulk orders or longer runs often reduce the per-foot cost. Mechanical Protection: Armored or reinforced cables for indoor/outdoor use may increase cost.

Supplier and Brand: Premium brands like Corning or Prysmian may charge higher prices for guaranteed quality and certifications. Customization: Options like color-coded fibers, pull rings, or printed designs can affect pricing.

### Purchasing Tips

For small-scale indoor installations, buying per foot from suppliers like Lanshack or Amazon is convenient. For data centers or large deployments, consider bulk orders from manufacturers like Weichuang Optics or Alibaba to reduce cost per foot. Always verify plenum or riser rating to comply with local fire codes and building regulations.

Request a quotation for exact pricing, especially if customization or long runs are required. By considering these factors, you can select a 12-core single-mode indoor fiber optic cable that balances cost, performance, and compliance for your specific installation needs.
