Key Takeaways

Cable trays in North Africa typically range from $20 to $150 per 2–3 meter section, depending on material, type, and finish.

Overview of Cable Tray Types and Materials

Cable trays are mechanical support systems for electrical cables, available in galvanized steel, stainless steel, and aluminum. Common types include: Ladder cable trays – ideal for heavy-duty installations and high cable density. Mesh trays – lightweight, flexible, and suitable for complex routing.

Ventilated trays – allow airflow to prevent overheating. Solid bottom trays – provide full protection for cables but may accumulate moisture.

Pricing Factors

The price of cable trays depends on: Material: Galvanized steel is generally the most affordable, while stainless steel (304 or 316 grade) is more expensive due to corrosion resistance. Finish: Pre-galvanized (light-duty) trays cost less than hot-dip galvanized (medium/heavy-duty) trays. Dimensions: Standard widths range from 25mm to 600mm, heights from 50mm to 600mm, and lengths typically 2.

44–2. 5 meters. Tray type: Ladder and ventilated trays are usually more expensive than mesh trays due to material usage and manufacturing complexity.

Example Prices

A 300mm x 50mm galvanized steel tray, 2. 5 meters long, is available in Nigeria, typically priced around $25–$40 per section. In South Africa, metal cable trays with pre-galvanized or hot-dip finishes range from $30 to $150 per 2–3 meter section, depending on material and load capacity.

Mesh and perforated trays in East Africa (Kenya) are priced similarly, with thicknesses from 0. 6mm to 3. 0mm affecting cost.

Additional Considerations

Custom sizes: Many suppliers can fabricate trays to specific dimensions, which may increase cost. Installation and transport: Some suppliers offer stackable and quick-install designs to reduce labor costs. Corrosion environment: For coastal or industrial areas, stainless steel or hot-dip galvanized trays are recommended despite higher prices.

In summary, for North African markets, expect galvanized steel cable trays to start around $20–$40 per 2–3 meter section, with stainless steel or heavy-duty trays reaching $100–$150 or more, depending on specifications and supplier.
