Price of Trough-type Flat Straight-through Cable Trays

Overview

Husky Trough Tray is a cable tray consisting of ventilated or solid bottom contained within longitudinal side members.

Key Takeaways

Trough-type flat straight-through cable trays typically range from $50 to $250 per 10-foot section, depending on material, size, and supplier. OverviewTrough-type cable trays are designed for efficient cable management, providing a secure pathway for electrical and data cables while limiting access and protecting the cables from damage ( ). They are commonly made from steel, pre-galvanized steel, or aluminum, with variations in width, depth, and load capacity affecting the price ( ).

Typical Price Range

Small to medium steel trough trays (6–12 inches wide, 4–6 inches deep, 10-foot sections) generally cost $50–$120 per section. Larger or heavy-duty steel trays designed for high cable loads or industrial applications can range from $150–$250 per 10-foot section. Aluminum or pre-galvanized trays may be slightly higher due to corrosion resistance and lighter weight, often $100–$200 per section.

Factors Affecting Price

Material: Steel is cheaper than aluminum; pre-galvanized or coated trays cost more. Dimensions: Wider and deeper trays for higher cable capacity are more expensive. Load Rating: Trays rated for heavy-duty industrial use cost more than standard office or data center trays.

Supplier and Quantity: Wholesale purchases or bulk orders can reduce per-unit cost, while single-unit retail purchases may be higher ( ).

Additional Considerations

Accessories: Covers, fittings, and mounting hardware are usually sold separately and can add $10–$50 per section. Delivery: Shipping costs vary by supplier and distance; some suppliers offer same-day or next-day delivery ( ). Compliance: Ensure trays meet UL or other local standards for electrical safety, especially for high-performance data or fiber optic cables ( ).

For precise pricing, it is recommended to request a quote from suppliers such as McMaster-Carr, Platt Electric Supply, or Alibaba, specifying the tray dimensions, material, and quantity needed ( ).
