Price of Waterproof Indoor Optical Cable

Overview

Waterproof optical cable, Watertight optical cable Find your waterproof optical cable easily amongst the 41 products from the leading brands (HUBER+SUHNER.

Key Takeaways

Waterproof indoor optical cables typically range from $0. 50 to $5 per meter depending on fiber count, jacket type, and pre-termination options. Price RangesSingle-mode or multi-mode indoor waterproof cables: $0.

50–$2 per meter for standard 2–12 fiber cables. Pre-terminated or multi-fiber assemblies: $2–$5 per meter, depending on connector type (LC, SC, SMA) and fiber count. High-performance or armored variants: Prices can exceed $5 per meter for specialized applications requiring extra durability, flame retardancy, or extreme temperature tolerance.

Factors Affecting Price

Fiber Count: More fibers per cable increase cost. Common indoor waterproof cables range from 2 to 24 fibers. Cable Jacket Material: PVC, LSZH (low-smoke zero halogen), or polyurethane jackets affect both price and environmental suitability.

Pre-

Termination: Factory-terminated cables with connectors are more expensive but reduce installation time. Waterproofing Method: Water-blocked cores or gel-filled tubes add to cost but improve reliability in humid or wet environments. Length and Customization: Longer cables or custom lengths may increase unit price, while bulk orders often reduce per-meter cost.

Suppliers and OptionsDirectIndustry: Offers a wide range of waterproof optical cables for indoor and industrial applications, including armored and flexible options. Mouser Electronics: Stocks indoor fiber optic cables with datasheets and pricing for standard lengths and fiber counts. FS.com: Provides pre-terminated indoor/outdoor multifiber cables at wholesale prices, saving installation costs.

Anixter and Comm

Scope: Offer indoor/outdoor water-blocked cables suitable for commercial installations, with options for riser-rated and plenum-rated applications.

Recommendations

For standard indoor installations, a 2–12 fiber PVC or LSZH water-blocked cable is cost-effective. For high-reliability or industrial environments, consider armored or polyurethane-jacketed cables with pre-terminated connectors. Always check supplier datasheets for temperature range, bend radius, and fire rating to ensure compliance with building codes and environmental conditions.

By considering fiber count, jacket type, and pre-termination, you can select a waterproof indoor optical cable that balances performance and cost.
