Price of a lb Distribution Box

Overview

Distribution Box Price, 2026 Distribution Box Price Manufacturers. For distributors seeking cheap rates or custom enclosures, wholesale per-unit pricing.

Key Takeaways

The price of an LB distribution box typically ranges from around $19 to over $96 per unit, depending on quantity and specifications. Pricing OverviewLB distribution boxes, also known as LB conduit bodies, are used to provide access points for wiring in electrical conduit systems. Pricing varies based on manufacturer, material, size, and quantity.

For example, Newark lists LB conduit boxes with prices starting at $19. 25 for a single unit and increasing to $96. 01 for larger or specialized units depending on order quantity and packaging type (cut-tape, re-reel, or full reels).

Bulk purchases generally reduce the per-unit cost.

Factors Affecting Cost

Material and Durability: Boxes made from corrosion-resistant metals or heavy-duty plastics cost more due to enhanced longevity and safety features. Voltage and Amperage Ratings: Higher-capacity boxes designed for commercial or industrial use are priced higher than standard residential units. Installation and Accessories: Some LB boxes include mounting hardware, covers, or integrated features like surge protection, which can increase the overall cost.

Quantity Discounts: Ordering in larger quantities often reduces the per-unit price, as seen in Newark's tiered pricing.

Estimating Price Per Pound

While most LB boxes are sold per unit rather than by weight, the cost per pound can be roughly estimated if the box weight is known. For example, a standard LB metal conduit box weighing 1–2 pounds would translate to approximately $19–$96 per pound, depending on the model and features. For heavier industrial boxes, the cost per pound may be lower due to economies of scale in larger units.

Additional Considerations

Outdoor vs Indoor Use: Weather-resistant or outdoor-rated LB boxes carry a premium price. Brand and Certification: Certified brands like Crouse-Hinds or Greenlee may cost more but offer compliance with electrical codes and higher reliability. Special Applications: Some LB boxes are designed for specific lighting systems or dual-voltage setups, which can affect pricing.

In summary, LB distribution boxes generally cost between $19 and $96 per unit, with the exact price influenced by material, size, capacity, and intended application. For precise budgeting, it is recommended to check the specific model and supplier, and consider installation and accessory costs.
