Price of cable tray and pipe support

Overview

Choose from our selection of tubing trays, including over 140 products in a wide range of styles and sizes. Same and Next Day Delivery.

Key Takeaways

Cable trays and pipe supports typically cost between $14 to $100+ per section, with supports and brackets adding 20–30% to the total installed cost.

Cable Tray Costs

The price of cable trays depends on the material, type, and size: Steel Ladder or Solid Bottom Trays: Moderate cost, widely used in industrial and commercial applications.

Wire Mesh/

Basket Trays: Lightweight and flexible, prices start as low as $0. 61 per foot for small sections, with larger or specialty trays costing $26–$100+ per section. Aluminum Trays: Higher material cost but lighter, reducing the need for heavy supports.

Stainless Steel Trays: Most expensive, used in hygienic or corrosive environments like food plants or coastal areas. Installation costs are generally lower for cable trays compared to conduit systems because trays allow cables to be laid directly without threading through pipes, saving labor time.

Pipe and Cable Tray Supports

Supports, brackets, and hangers are essential for securing trays and pipes. They typically account for 20–30% of the total installed cost: Trapeze Hangers: Used to suspend trays from ceilings; available in pre-galvanized or steel finishes, with lengths from 6" to 28" depending on tray width. Strut Systems and Pipe Hangers: Provide mechanical support for both cable trays and pipes, including seismic or vibration-resistant options.

Adjustable Brackets and Splice Plates: Used for corners, turns, and connecting tray sections; prices vary by design and material.

Factors Affecting Total Cost

Material Choice: Pre-galvanized steel is cheapest, hot-dip galvanized and aluminum are mid-range, stainless steel is highest. Labor Costs: North America and Europe have higher labor costs, making fast-install systems like snap-together trays or aluminum trays more cost-effective. Accessories: Fittings, covers, and additional supports can significantly increase the total project cost.

Project Location: Shipping, local labor rates, and regional metal prices influence the final cost.

Summary

Cable Tray Sections: $14–$100+ per section depending on material and size. Supports and Brackets: Add 20–30% to the total installed cost. Wire Mesh Trays: Cheapest option for light cabling, starting at $0.

61 per foot. Aluminum and Stainless Steel: Higher upfront cost but may reduce labor and support requirements. For accurate pricing, it is recommended to request quotes from suppliers like McMaster-Carr, Graybar, Legrand, or Eaton, specifying tray type, material, and required supports for your project location.
