Price of cable trays for large cables

Overview

Discover cable management solutions featuring steel construction and durable finishes. Organize your network, power, and data cables efficiently.

Key Takeaways

Cable tray prices vary widely depending on material, size, load capacity, and finish, with heavy-duty trays for large cables typically costing more than medium or light-duty options.

Factors Affecting Price

Material: Galvanized Steel: Common for industrial use; offers durability and corrosion resistance. Pre-galvanized steel is generally less expensive than hot-dipped galvanized steel. Stainless Steel (304 or 316): Higher corrosion resistance and longevity; suitable for harsh environments, but more costly.

Aluminum: Lightweight and corrosion-resistant; moderately priced.

PV

C: Fire-resistant and weatherproof; usually cheaper than metal trays but limited to lighter loads. Tray Type and Design: Ladder Cable Trays: Ideal for heavy power cables; generally more expensive due to structural strength.

Wire Mesh/

Basket Trays: Flexible and easier to install; moderate cost. Solid or Perforated Base Trays: Solid trays offer better protection but cost more; perforated trays allow ventilation and easier cable management. Load Capacity and Duty Rating: Heavy-Duty Trays: Designed for large, high-load cables; higher cost due to thicker gauge steel and reinforced construction.

Medium-

Duty Trays: Suitable for moderate cable loads; moderately priced.

Light-

Duty Trays: For small cables or low-load applications; lowest cost. Dimensions: Widths typically range from 50mm to 600mm, with lengths of 1m or 3m. Larger widths and longer lengths increase cost.

Finishes and Coatings: Hot-Dipped Galvanized: Higher corrosion resistance; more expensive. Epoxy or Powder Coating: Adds protection in harsh environments; increases price. Typical Price Ranges (Indicative)Light-Duty PVC or Steel Trays: Approximately $20–$50 per meter.

Medium-

Duty Steel Trays (Pre-Galvanized): Around $50–$100 per meter.

Heavy-

Duty Steel or Stainless Steel Trays: $100–$250+ per meter depending on width, thickness, and finish.

Additional Costs

Accessories: Couplers, bends, tees, risers, and lids can add 10–30% to the total cost. Installation: Labor and support systems (brackets, hangers) may significantly affect overall project cost.

Summary

For large cables, heavy-duty ladder or solid-base trays made of galvanized or stainless steel are recommended. Prices vary based on material, size, and finish, with heavy-duty trays costing $100–$250+ per meter, while medium and light-duty options are more affordable. Always consider accessories and installation costs when budgeting for a complete cable tray system.
