Price of electrical distribution boxes for large clubhouses

Overview

Amazon.com: Power Distribution BoxBrowse power distribution boxes with circuit breaker protection and multiple outlet configurations. Shop durable solution.

Key Takeaways

Electrical distribution boxes for large clubhouses typically range from $500 to $5,000 or more, depending on capacity, features, and customization.

Cost Overview

The price of a distribution box depends on several factors including voltage rating, amperage capacity, number of circuits, material construction, and integrated safety features. For large clubhouses, which require high-capacity three-phase systems, commercial-grade boxes are recommended. These units are more expensive than standard residential boxes due to their durability, advanced control systems, and compliance with electrical codes (Sunnom.com).

Standard residential units: $100–$500 for single-phase or small three-phase systems. Commercial/industrial units: $500–$5,000+, depending on size, number of circuits, and features such as smart monitoring, remote control, and digital displays (Sunnom.com). Weatherproof or outdoor-rated enclosures: Typically carry a premium due to environmental protection requirements (Sunnom.com).

Supplier Options

Home Depot offers breaker boxes from brands like Siemens, Square D, and Leviton, with mid-range commercial options such as the Square D Homeline 200 Amp 30-Space 60-Circuit Load Center (HOM3060M200PCVP) (HomeDepot.com). Amazon provides smaller power distribution boxes for temporary or modular setups, often used for CCTV or access control systems (Amazon.com). SupplyHouse.com and Made-in-China.com offer a wide range of enclosures, including customizable and modular options for large-scale projects, with bulk pricing available for distributors or large orders (SupplyHouse.com, Made-in-China.com).

Additional Considerations

Installation costs: Professional installation is recommended for large clubhouses and can significantly add to the total project cost. Customization: Options like specific mounting configurations, busbar fitment, and OEM branding can increase the price but improve operational efficiency (Made-in-China.com). Energy efficiency: Units with advanced load management and monitoring may have higher upfront costs but reduce long-term energy expenses (Sunnom.com).

For budgeting purposes, a high-capacity, commercial-grade distribution box for a large clubhouse is likely to cost $1,000–$5,000 per unit, with additional costs for installation, customization, and energy management features. Contacting suppliers directly for quotes is recommended to account for specific clubhouse requirements and local electrical codes.
