Price of wiring to a 2-port fiber optic terminal box

Overview

Amazon.com: Fiber Termination BoxFiber Optic Wall Mount Box with LC Couplers for Single Mode & Multimode Fiber Optic Cable. | Fiber Box Enclosure for MPOE'.

Key Takeaways

The cost of wiring to a 2-port fiber optic terminal box typically ranges from $20 to $100 for the box itself, with installation costs adding $50 to $200 depending on complexity and labor.

Terminal Box Cost

A standard 2-port fiber optic terminal box is a compact indoor enclosure used for splicing, terminating, and connecting fiber optic cables in residential or office setups. Prices for these boxes vary based on features such as preloaded adapters, SC or LC compatibility, and build quality: Basic ABS plastic 2-port boxes: $20–$40Preloaded or customizable boxes with adapters: $40–$100 Wiring and Installation CostsThe cost of wiring includes the fiber optic cable, connectors, and labor for installation: Fiber optic cable: $0. 50–$2 per foot for single-mode or multi-mode indoor cableConnectors and pigtails: $5–$15 per connectorLabor: $50–$200 depending on wall mounting, cable routing, and splicing complexity For a typical home or small office installation, wiring a 2-port terminal box can cost $100–$300 total, including materials and professional installation.

Additional Considerations

Indoor vs. outdoor installation: Outdoor-rated boxes with IP65 protection cost more. Splicing type: Fusion splicing is more expensive than mechanical splicing. Cable length and routing: Longer runs or difficult wall/ceiling access increase labor costs.

Bulk orders: Purchasing multiple boxes or cables from suppliers like Alibaba or Amazon can reduce per-unit costs. By considering both the box and installation, you can budget effectively for a 2-port fiber optic setup in residential or commercial environments.
