Price range of corrosion-resistant cable trays in China and Europe

Overview

"Anti Corrosion Cable Tray" Factory direct options come straight from the manufacturer, ensuring competitive pricing and available in trendy configurations.

Key Takeaways

Corrosion-resistant cable trays in China typically range from USD 15 to 120 per meter, while in Europe, prices are higher, generally between USD 50 and 250 per meter depending on material and specifications.

Price Range in China

In China, corrosion-resistant cable trays are widely available from manufacturers and suppliers, with prices influenced by material, design, and customization options. Common materials include Fiberglass Reinforced Plastic (FRP), stainless steel (304, 316L), and powder-coated steel.

FR

P trays, known for their lightweight, non-conductive, and highly corrosion-resistant properties, are typically priced between USD 15 and 60 per meter for standard industrial applications, while high-grade stainless steel trays can range from USD 80 to 120 per meter depending on thickness, load capacity, and surface treatment.

Factory-direct and OE

M orders can reduce costs, especially for bulk purchases.

Price Range in Europe

In Europe, corrosion-resistant cable trays are generally more expensive due to higher labor costs, stricter compliance with EN and IEC standards, and sustainable manufacturing practices.

FR

P trays in Europe can cost USD 50 to 120 per meter, while stainless steel options, particularly 316L for marine or chemical environments, may range from USD 150 to 250 per meter. Prices also vary based on certifications, fire resistance ratings, and modular design features for easier installation and future expansion.

Factors Affecting Pricing

Material Type: FRP is cheaper and lightweight, stainless steel is more durable but costlier. Environmental Exposure: Coastal, chemical, or high-humidity environments require higher-grade materials, increasing cost. Customization: OEM or modular designs tailored to specific projects can raise prices.

Volume: Bulk orders in China can significantly reduce per-meter costs. Compliance and Certification: European products often include certifications for fire safety, load capacity, and corrosion resistance, contributing to higher prices.

Summary

China: USD 15–120 per meter (FRP and stainless steel)Europe: USD 50–250 per meter (FRP and stainless steel, higher-grade materials for demanding environments) Choosing the right supplier involves balancing cost, material performance, and compliance requirements, with China offering competitive pricing for large-scale projects and Europe providing high-specification products for stringent industrial standards.
