Protective Box for Drop Cables

Overview

A Fiber Drop Cable Protection Box is a small, weatherproof enclosure designed to protect the fiber optic drop cable connection—typically the point where the outdoor cable meets the indoor wiring or subscriber terminal. Made from high-strength ABS material, this box is both durable and lightweight, offering IP67-rated waterproof protection with a secure rubber. FTTH lead-in optical cable protection box is used to protect the two optical fiber lines from being connected and extended without being damaged, and preventing dust from entering the connection place. It can be used indoors and outdoors. It supports 1 SC simplex adapter and 2 SC fast connectors, ideal for splicing and protecting 2. 0mm, or 2×3mm fiber cables.
