Ranking of Ultraviolet Laser Diode Manufacturers

Overview

The global key companies of UV Laser Diode include Sony, Nichia, Sharp, Ushio, Egismos Technology, Thorlabs, TOPTICA Photonics, Huaguang Photoelectric, etc. In 2024, the global five largest players hold a share approximately % in terms of revenue. Let's take a closer look at the top 10 companies that are shaping the laser diode market globally. With a rich history of innovation in photonics, the company offers diode lasers for a. The global market for UV Laser Diode was estimated to be worth US$ million in 2024 and is forecast to a readjusted size of US$ million by 2031 with a CAGR of %during the forecast period 2025-2031. Since 1969, Power Technology, Inc. has innovated in laser technology, offering modules for diverse fields like semiconductor manufacturing, biomedical, industrial, and defense. What Is a Laser Diode?

What Is a Laser Diode?

A laser diode is a device. Ultraviolet (UV) lasers are light sources emitting electromagnetic radiation with wavelengths typically between 100 nm and 400 nm. They are distinguished by their high photon energy, which allows for photochemical ablation (breaking molecular bonds directly) rather than photothermal ablation. Our latest scoreboard reveals how Laser Diode market companies out-maneuver rivals while the total addressable market expands from US $3,150. 00 million in 2024 to US $5,339. The ranking synthesizes quantitative and qualitative inputs. We weight 2024 revenue at 35%, three-year.

Article Content

UV Laser Diode

This report aims to provide a comprehensive presentation of the global market for UV Laser Diode, focusing on the total sales volume, sales revenue, price, key companies market share and ranking,

48 Laser Diode Manufacturers in 2026

This section provides an overview for laser diodes as well as their applications and principles. Also, please take a look at the list of 48 laser diode manufacturers and their company rankings.

Ultraviolet Lasers – Buyer''s Guide & Supplier List | RP Photonics

This buyer''s guide for ultraviolet lasers provides technical background, comparison of major types, selection criteria, and an overview of suppliers.

Top Laser Diode Market Companies

Authoritative ranking, profiles, SWOT and strategic outlook of top Laser Diode market companies, covering revenues, growth drivers and regional competitiveness through 2031.

Global UV Laser Diode Market 2025 by Manufacturers, Regions, Type

This report is a detailed and comprehensive analysis for global UV Laser Diode market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type

Top 21 Optical Laser Manufacturing Companies

Read on to discover the top optical laser manufacturing companies. 1. Spectra-Physics, based in Andover, Massachusetts, is a high-tech company that specializes in the development and

Top 10 Laser Technology Companies and Their Portfolio

Laser technology companies are at the heart of industries like manufacturing, healthcare, telecom, aerospace, and even consumer electronics. They''re constantly pushing the boundaries to grow their

Top 5 Laser Diode Manufacturers in the World

The global laser diode market size reached US$ 11.6 Billion in 2023. As per the analysis by IMARC Group, the top laser diode companies are focusing on continuous investments in research and

© 2026 FD SOLUCIONES OPTICAL SYSTEMS - All rights reserved

Ultraviolet laser, UV laser

(DPSS) lasers and diode lasers, the wavelength covering range is from the ultraviolet to the infrared band (213 ~ 3800 nm). Linear prisms, fiber coupling, beam expander and other accessories can be

Laser Diode Manufacturers

A Laser Diode is a type of semiconductor device that produces coherent light through the process of stimulated emission. The leading manufacturers of Laser Diodes are listed below. Narrow down on

UV Lasers Market Size, Trend & Share | CAGR of 8%

UV lasers are lasers (or other laser-based light sources) that generate ultraviolet light. Some of them can reach very high output power levels. Ultraviolet (UV) laser optics are vital for

Lasers Market Report | Industry Analysis, Size & Growth Trends

Lasers Market Size & Share Analysis - Growth Trends and Forecast (2026 - 2031) The Lasers Market Report is Segmented by Laser Type (Fiber Lasers, Diode Lasers, and More),

Laser Diode Companies

Top Laser Diode Companies, Leaders & Major Players Explore list of the top Laser Diode companies based on extensive research conducted by Mordor Intelligence analysts and expert advisors. These

GaN Laser Diode Chips Market Research Report 2034

The GaN laser diode chips market was valued at $1.38 billion in 2025 and is projected to reach $3.55 billion by 2034, growing at 11.2% CAGR through emerging applications.

Top 10 Companies Offering Advanced UV Laser Technologies In 2023

This laser can help users reduce their costs per part in PCB drilling & paneling, SiP cutting, and other applications. Road Ahead for Demand for UV Lasers UV lasers are becoming

Diode Laser

Global Laser Diode key players include Sony, Nichia, Sharp, Ushio, Osram, etc. Global top five manufacturers hold a share over 65%. North America is the largest market, with a share over 25%,

Diodes Companies

© 2026 FD SOLUCIONES OPTICAL SYSTEMS - All rights reserved

List of the top Diodes companies based on extensive research conducted by Mordor Intelligence analysts and expert advisors that identified these brands to be the leaders and major players in the

Laser Diode Market Report: Size, Growth, Trends & Forecast

Laser Diode Market size was valued at USD 11.35 Billion in 2024 and is projected to reach USD 26.73 Billion by 2032, growing at a CAGR of 11.30% from 2026-2032 The report provides key trends,
