Reseller of OSFP Optical Active Device

Overview

High-density 800G OSFP and QSFP-DD transceivers support InfiniBand and RoCE, enabling 100m to 2km transmission via MMF and SMF.

Key Takeaways

HPC Optics, FLEXOPTIX, Amphenol, and TE Connectivity are key suppliers of OSFP optical active devices and cable assemblies. Key SuppliersHPC Optics is a leading supplier of fiber optic transceivers and active optical cables (AOC), including OSFP modules suitable for high-performance computing networks and data centers, offering a wide range of high-speed interconnect solutions for modern infrastructure needs.

FLEXOPTI

X provides industrial-grade transceivers and OSFP-compatible solutions, including tools for easy configuration and batch setup, making them suitable for lab testing, commissioning, and deployment in power electronics and high-speed networks. Amphenol offers OSFP cable assemblies in both passive and active variants, supporting 25G/lane NRZ up to 224G/lane PAM4 signaling. Their products deliver aggregate bandwidths from 200G to 1.

6T per cable assembly, making them ideal for high-density data center applications.

E Connectivity (TE) supplies OSFP connectors and cable assemblies with integrated thermal management, supporting data rates from 200 Gbps up to 1. 6 Tbps. TE's OSFP solutions are designed for high-density, high-power network environments and are compatible with multiple signaling standards including 28G NRZ, 56G PAM4, 112G PAM4, and 224G PAM4.

Considerations for Selection

Bandwidth Requirements: Choose OSFP devices based on lane speed and aggregate bandwidth needs (200G–1. 6T). Active vs Passive: Active optical cables (AOC) are preferred for longer distances and high-speed performance, while passive cables are cost-effective for short-range connections.

Thermal Management: Some suppliers, like TE, integrate heatsinks to maintain signal integrity at high data rates. Compatibility: Ensure the OSFP modules are compatible with your existing network hardware and signaling protocols. These suppliers provide both direct sales and distribution channels, making them suitable for procurement in enterprise, cloud, and HPC environments.
