Rooftop equipment cable tray price

Overview

Rooftop Duct Supports & Cable Trays | Protech OnlineShopping for cable trays & supports with Protech Online is a great way to prevent damage to your roofto.

Key Takeaways

Rooftop cable trays typically range from $50 to $500 per section, depending on material, size, and support system requirements.

Price Overview

The cost of a rooftop cable tray depends on several factors: Material: Aluminum trays are common for rooftop installations due to their lightweight and corrosion resistance, while steel trays may cost more but offer higher load capacity. Tray Type and Size: Straight ladder trays, horizontal bends, and step-over trays vary in price. Larger widths and longer sections increase cost.

Support Systems: Rooftop cable trays require supports, bases, and bracing. Systems like PHP's cable tray supports or Protech's duct supports add to the overall cost. Shipping and Freight: Due to size and weight, shipping can significantly affect the final price.

Some suppliers recommend contacting them directly for accurate freight estimates.

Typical Price Ranges

Small aluminum ladder trays (2–4 feet): $50–$150 per section. Medium trays with bends or step-over features: $150–$300 per section. Complete support systems with bases and bracing: $300–$500 or more, depending on height and load requirements.

Additional Considerations

Installation Costs: Labor for mounting trays and supports on rooftops can add 20–50% to material costs. Customization: Custom widths, heights, or double/triple bracing will increase the price. Durability and Warranty: Investing in high-quality trays and supports can reduce long-term maintenance and replacement costs.

For the most accurate pricing, it is recommended to contact suppliers directly, such as Talley LLC, Site Pro 1, PHP, or Protech Online, as they can provide quotes based on your specific rooftop layout and cable requirements.
