Singapore 3-Year Warranty Optical Electro-Mechatic Cable 100G

Overview

These AOCs comply with hot-pluggable QSFP28 MSA and RoHS-6 standards, ensuring compatibility and adherence to environmental regulations.

Key Takeaways

A 3-year warranty for 100G optical or electro-mechanical cables in Singapore typically covers defects in materials and workmanship under normal use, with repair, replacement, or exchange provided at the supplier's discretion.

Warranty Coverage

Most Singapore-based suppliers, such as Kabeltec, offer warranties that ensure products are free from defects in materials or workmanship for a defined period, often starting from the date of delivery. For a 3-year warranty, this means the cable is covered for 36 months under normal operating conditions. The warranty generally includes: Repair or replacement of defective cables or components.

Exchange with equivalent products if repair is not feasible. Coverage continues for the remaining warranty period after replacement or repair.

Terms and Conditions

Typical conditions for maintaining warranty validity include: Proper installation and usage according to manufacturer specifications. Avoiding misuse, tampering, modification, or unauthorized repairs. Using the cable within its rated capacity and environmental limits.

© 2026 FD SOLUCIONES OPTICAL SYSTEMS - All rights reserved

Retaining the original proof of purchase for warranty claims. Exclusions often include: Damage from natural wear and tear, mishandling, or improper storage. Failures caused by overloading, incorrect installation, or unapproved accessories.

Any consequential damages such as data loss or downtime are usually not covered.

Warranty Process

In Singapore, the warranty process is generally straightforward: Contact the supplier or authorized distributor with proof of purchase. Assessment of the defect by the supplier. Repair, replacement, or exchange of the cable at the supplier's discretion.

Repaired or replaced items continue to be covered for the remaining warranty period.

Additional Notes

Some suppliers, like element14 Singapore, offer fast delivery and technical support alongside warranty coverage, which can be beneficial for high-speed 100G networking deployments. Extended warranties may be available for certain products, but it is important to verify eligibility for optical or electro-mechanical cables specifically. In summary, a 3-year warranty in Singapore for 100G optical or electro-mechanical cables ensures protection against manufacturing defects, with repair or replacement provided under defined conditions, while excluding damage from misuse or improper handling.

Always check the supplier's specific warranty terms before purchase to confirm coverage.
