Key Takeaways

A small distribution box with a switch is a compact electrical enclosure that houses circuit breakers or switches, providing organized power distribution and protection for circuits in residential, commercial, or industrial settings.

Key Features

Size and Mounting: Small distribution boxes are typically compact, with dimensions around 18 x 14 x 9. 7 cm for surface-mounted models, suitable for indoor areas such as basements, garages, or damp rooms. They can be surface-mounted or flush-mounted depending on installation needs.

Material and Durability: High-quality boxes are made from polycarbonate or ABS, offering heat and shock resistance, and can operate in temperatures from -25°C to +60°C. Many models are IP40 rated, providing protection against solid objects and limited moisture. Switch and Circuit Protection: These boxes can accommodate modular switches or automatic circuit breakers, allowing you to control and protect multiple circuits.

Some models include brass clamps, top-hat rails, and screw sets for easy installation. Modularity and Flexibility: Modular designs allow for different combinations of inputs and outputs, making it easy to expand or customize the distribution for specific rooms, floors, or devices. Transparent covers and labeling options help identify circuits quickly.

Installation and Safety: Many small distribution boxes feature spring-loaded or lockable covers, easy-to-mount keyholes, and compliance with international standards (IEC 61439). They are suitable for decentralized installations and can integrate with building automation or sensor/actuator systems.

Applications

Residential: Protects household circuits and allows easy access to switches for lighting or appliances. Commercial: Organizes power distribution for offices, workshops, or small retail spaces. Industrial: Connects sensors, actuators, or automation devices in decentralized setups, often using M12 or M23 connectors for quick and secure cabling.

Examples

Lion Electric Surface-

Mounted Box: 1-row, 2–6 modules, transparent door, IP40, suitable for damp rooms and garages.

Distro-

Direct Type 10/11 Series: Compact modular units with options for protective breakers and labelling. Phoenix Contact Distributor Boxes: Designed for industrial applications with tool-free M12 push-pull connections and status indicators. These small distribution boxes provide a safe, organized, and flexible solution for managing electrical circuits while allowing easy access to switches and breakers.
