

Southeast Asian fire protection electrical distribution box

Overview

Fire Prevention Specifications: Do not pile up flammable and explosive materials around electrical equipment; equip fire extinguishers (dry powder, carbon dioxide) near distribution boxes and transformers; regularly check for fire hazards. Most electrical fires are caused by long-term ignored hidden dangers, such as overloading, line aging, poor contact, and improper use of electrical equipment. These hidden dangers are easy to be ignored in daily production, but they will be magnified in the harsh environment of Southeast Asia. Overseas construction sites in Southeast Asia (such as infrastructure, factory construction) have complex environments, mobile electrical equipment, and frequent personnel mobility, which are high-risk areas for electrical safety accidents. Mastering the basic electrical safety specifications can. We are Global Fire Equipment (GFE), one of the fastest growing fire safety system manufacturers in the world. We have a dedicated team working throughout Southeast Asia from a base in Manila and Cebu in the Philippines. The Energy. The Fire Protection Distribution Box Series is a professional outdoor metal enclosure under Fire Protection Box Series.
