Specifications of Iranian Cable Trays

Overview

EXPORT-ready Cable tray and cable ladder made in Iran by .Tafakornia Industrial Group.. Specs, certifications, minimum order quantity, lead time, Incoterms & packaging. Request a quotation.

Key Takeaways

Iranian cable trays are available in various types including ladder, tray, and pultruded composite models, with specifications tailored for industrial, commercial, and corrosive environments. Types of Cable Trays1.

Ladder-

Type Cable Trays

Commonly used for heavy-duty applications and high cable density. Made from galvanized steel, stainless steel, or aluminum. Accessories include knees, three-way intersections, connectors, wall supports, roof supports, and conversions.

Hot-dip galvanized trays provide 60–70 microns coating, offering high resistance to moisture and corrosion, suitable for outdoor or humid environments. Cold-galvanized trays have 10–20 microns coating, suitable for dry indoor areas. 2.

Pultruded Composite (FRP) Cable TraysFabricated using pultrusion, incorporating high-strength resin and reinforcements. Lightweight yet strong, resistant to chemicals, UV, acids, salts, and alkalis. Ideal for marine, chemical, and corrosive industrial environments.

Offers lower installation costs and easier handling compared to metallic trays. 3.

Standard Tray and Ladder Systems

Widths range from 50 mm to 1100 mm, lengths 2–3 meters, and thickness 0. 5–2 mm. Materials include galvanized sheet steel, ST37 steel, and stainless steel.

Coating options: hot-dip galvanized, pre-galvanized, electrostatically powder-coated. Suitable for control panels, building interiors, refineries, and food industry applications.

Accessories and Installation Components

Connectors, elbows, tees, crosses, reducers for routing cables. Wall and roof supports for secure mounting. Specialized clamps and fasteners for high-density or narrow installations.

Manufacturer Highlights in Iran

Eagle Barq Co.: Sole agent for SPINA/SCHIAVETTI TEKNO, offering advanced cable tray systems and custom designs. Jooyeshgar and Taliran Engineering: Provide a wide range of trays, ladders, and accessories for oil, gas, petrochemical, and industrial sectors.

M

T Group: Specializes in pultruded FRP trays for corrosive and chemical environments.

Key Considerations

Environment: Choose hot-dip galvanized or FRP for humid, corrosive, or outdoor conditions. Load and cable density: Ladder trays are preferred for heavy loads; pultruded trays for chemical resistance. Installation space: Narrow trays are suitable for control panels or tight spaces.

Compliance: Ensure materials meet EN 6063 or relevant Iranian standards for safety and durability. Iranian cable trays offer a versatile range of models suitable for industrial, commercial, and specialized applications, with options for corrosion resistance, mechanical strength, and ease of installation.
