Standard Price of Level 3 Distribution Box

Overview

Distribution Box Price, 2026 Distribution Box Price Manufacturers. For distributors seeking cheap rates or custom enclosures, wholesale per-unit pricing.

Key Takeaways

The typical price of a Level 3 distribution box ranges from approximately $300 to $1,500, depending on material, capacity, and features.

Price Overview

Level 3 distribution boxes are generally industrial or commercial-grade units designed to handle higher power loads and multiple circuits. Their cost is influenced by several factors: Material: Plastic boxes are the cheapest, often under $10–$25 for small residential units, while steel or aluminum boxes for industrial use start around $40 and can reach several hundred dollars. Concrete boxes, used in specialized applications, can cost $100–$400 or more.

Capacity and Size: Larger boxes with more circuits or higher amperage ratings cost more. For example, a small 4-circuit box may cost $15, whereas a 40-circuit industrial panel can exceed $300. Protection Grade: Units with higher IP ratings (e.g., IP65 waterproof and dustproof) or weather-resistant enclosures carry premium pricing.

Internal Components: Boxes sold empty are cheaper, but adding high-quality circuit breakers, surge protectors, and busbars increases the price significantly. Brand and Quality: Well-known brands like Schneider Electric, Siemens, ABB, and Chint Electric provide reliable performance and after-sales support, which can increase the cost compared to lesser-known brands.

Additional Considerations

Installation and Maintenance: The total investment includes not just the purchase price but also installation, maintenance, and long-term operational costs. Advanced Features: Modern distribution boxes may include smart monitoring, remote control, and energy management systems, which can further raise the price. Environmental and Safety Compliance: Outdoor or industrial applications often require corrosion-resistant materials and compliance with electrical codes, adding to the cost.

In summary, for a Level 3 distribution box, which typically refers to a high-capacity, industrial-grade unit, you can expect to pay between $300 and $1,500, with the final price depending on material, size, protection features, internal components, and brand reputation.
