Switch optical signal light turns red

Overview

Several reasons can cause the LOS light to blink red: Fiber Optic Cable Damage: A physical cut or bend in the fiber optic cable can disrupt the signal. The LOS light on your router indicates the status of your internet connection to the Internet Service Provider (ISP). When it's green and steady, everything is fine. Fortunately, diagnosing and resolving these issues doesn't have to be. If you find that the Optical/Config/PON Light on your Fibre ONT (Optical Network Terminal) box is flashing, has gone off, or has gone red, this indicates there may be an issue with the fibre connection coming into your property. What Can I Do?

First, please check that the optical cable which comes. Status Light: An LED indicating the system's operating status, usually a dual-color (red/green) light. It flashes green during the initialization phase, remains solid green after successful initialization, and turns red when a system fault occurs. You'll need a tech out to get it fixed, unfortunately. Nope, only fix is to switch ISP's. Frontier. My KASA HS200 worked great since early 2023. Any suggestions?

Your Highness.
