Switching from mobile to fiber optic requires changing the router

Overview

Upgrading to a Wi-Fi 6 or 6E router helps you get the full benefit of symmetrical fiber speeds. Just know that bringing your own gear means you handle network troubleshooting yourself, though Mercury Fiber still supplies all the foundational equipment you need to get connected. When switching to fiber internet, many users wonder if they're able to use their own router instead of the one provided by their internet service provider (ISP). Whether you're comparing internet providers or preparing for installation, knowing what hardware you'll need helps ensure a smooth. A key aspect of upgrading to Full Fibre broadband is ensuring you have the right router. Full Fibre connections involve fibre-optic cables running directly into your home, delivering higher speeds and more consistent connectivity than traditional broadband.
