

T400S fusion spliced optical cable

Overview

The T-400S is a high-speed, precise fusion splicer designed for optimal performance in both field and lab environments. It features automatic splicing, rapid heat times, and a user-friendly interface, all in a compact and durable design. SUMITOMO ELECTRIC Active Clad Alignment fusion splicer T-400S Fast, Carry out your mission as fast as possible Qes start Versatile, All the FTTx fiber splices in one machine Easy Simple operation by brand-new user interface SUMITOMO ELECTRIC GROUP SUMITOMO ELECTRIC Active Clad Alignment fusion. temperature with Sumitomo identical fiber. Measured by cut-back method relevant to ITU-T and IEC standards. Do not use the splicer in a hazardous location in which inflammable gas can generate or only electrical apparatus for explosive gas atmosphere can be used. Ideal for a variety of fiber optic applications, it ensures. To solve this problem, we have developed the T-400S, a new active V-groove fusion splicer. Features Table 1 shows the product specifications of T-400S. With the concept of being user friendly even for less-expe-rienced workers, we have developed a product that (1) reduces operational errors. SEL's new T-400S Active Clad Handheld Fusion Splicer features a high resolution display, fiber end face evaluation and post joining loss estimation providing assurance of a successful fiber termination.

temperature with Sumitomo identical fiber. Measured by cut-back method relevant to ITU-T and IEC standards. *2 : Splice & Heat cycles may vary depending on the battery status and the operating .

T-400S Active V-groove Fusion Splicer

We have also developed an optical fiber cleaver that cleaves optical fibers to be fusion-spliced. The cleaver uses a new pendulum mechanism for improved operability.

T-400S Active Clad Alignment Handheld Fusion Splicer Description

SEL's new T-400S Active Clad Handheld Fusion Splicer features a high resolution display, fiber end face evaluation and post joining loss estimation providing assurance of a successful fiber termination. The

SUMITOMO T-400S MANUAL Pdf Download | ManualsLib

The T-400S automatically pre-inspects and aligns a pair of optical single fibers with equipped microscopes, and then fuses them together with heat from an electric

Sumitomo | T-400S Active Clad Alignment Fusion Splicer

Sumitomo's new T-400S Active Sleeve Aligned Fiber Splicer provides reliable fiber optic cable termination, a high-resolution display, fiber cable end control, and

What Is Splicing Machine

T400S fusion splicer sets the standard for core alignment fusion splicing by incorporating a user-friendly interface with enhanced features to

Sumitomo T-400S Fusion Splicer Overview | PDF | Optical Fiber
