The color composed of twelve pigtails

Overview

Pigtails When ordering sets of pigtails, they are supplied with the colors from 1 to 12. For example if a set of 6 pigtails is ordered the colors supplied.

Key Takeaways

The standard 12-color fiber optic pigtail set includes red, green, blue, yellow, white, grey, brown, violet, turquoise, black, orange, and pink.

Standard Color Coding

A 12-fiber pigtail set is typically color-coded according to DIN VDE 0888 or similar industry standards to ensure easy identification and error-free installation. The colors of the 12 fibers are:
RedGreenBlueYellowWhiteGreyBrownVioletTurquoiseBlackOrangePink Each fiber's 900µm jacket color matches the 250µm fiber coating, making it easy to identify individual fibers during splicing or termination. This color coding is consistent across single-mode (OS2) and multi-mode (OM1, OM2, OM3, OM4, OM5) pigtails.

Applications and Benefits

Easy Identification: Color-coded fibers allow technicians to quickly match fibers during installation and maintenance. Error Reduction: Reduces the risk of misconnection in data centers, telecom networks, and FTTH deployments. Standard Compliance: Adheres to international standards for fiber optic cabling, ensuring compatibility across devices and systems.
