Time Delay Protector for Home Distribution Boxes

Overview

A time-delay RCD, also known as an S-type RCD, is designed to sit upstream of downstream 30 mA protection so the final circuit trips first in a fault. That makes it useful where you need selectivity, reduced nuisance tripping, and better continuity across EV, PV and distribution setups. This breaker is compatible with Homeline load centers and CSED devices. The ANSI-certified and UL-Listed unit is rated for 120/240 VAC and 10,000. 2 pole time delay RCDs offer enhanced circuit protection by disconnecting both live and neutral conductors after a brief, intentional delay. Ideal. Refrigmatic 2 in 1 Voltage & Surge Protector for Refrigerators (2 Pack) | Protects refrigerators Up to 27 cu. Includes safety delay time and LED indicator system This product has sustainability features recognized by trusted certifications. It is suitable for current or load with single-phase AC voltage of 220V, frequency of 50Hz, and rated working current of 60A and below.
