

Using a 3m fiber optic patch cord

Overview

Factory-terminated connectors are designed to meet stringent mechanical and environmental specifications for most interconnect applications. 3M patch cords are designed especially for building back bone and passive optical LAN installations. 3M™ Pigtails provide a single connector. A fiber optic patch cord wire, also known as a fiber optic jumper, is a very short cable that connects multiple active devices in the network set up at data centers or enterprise-level settings. It is essential so the data may pass rapidly and without slowing down through the wires connecting. 3M™ Patch Cords provide the interface between distribution cables and active optical equipment.
