Wholesale Price of High Temperature Resistant Communication Cabinets

Overview

Alibaba offers a large selection of wholesale communication cabinets for mounting and storing your servers. These network cabinets are built to keep dust and contaminants away from hardware.

Key Takeaways

High temperature resistant communication cabinets are available wholesale from approximately $100 to $320 per unit, depending on size, IP rating, and cooling features.

Pricing Overview

Wholesale prices for communication cabinets vary based on material, size, IP rating, and thermal management. Basic IP65 cabinets suitable for harsh environments start around $100 per unit for bulk orders, while mid-range models with integrated air conditioning or active cooling systems range from $168 to $320 per unit. Premium solutions from Fortune 500-validated suppliers may offer volume discounts starting at $146 per set.

Key Features Affecting PriceIP Rating: IP55 cabinets provide standard weather resistance, while IP65/IP66 units offer complete dust ingress protection and high-pressure water resistance, which is critical for extreme climates. Material: Powder-coated steel (1. 5–2mm) balances durability and cost, whereas aluminum alloys provide superior corrosion resistance but increase costs by 15–20%.

Cooling Options: Cabinets housing electronics or batteries require active cooling (fans or AC) to prevent overheating, while passive ventilation suffices for non-electronic storage. Customization: Many manufacturers offer OEM/ODM services, allowing adjustments in dimensions, panel support, and port density to meet specific technical requirements.

Supplier Options

Shanghai Hui

Jue Technologies: Offers premium cabinets with volume discounts and high reliability. Abel Energy and Tutai Electric: Provide IP55/IP65-rated units with integrated cooling at competitive mid-range pricing. Foshan Yuhe: Budget-friendly IP65 cabinets starting at $100 per unit, suitable for smaller installations.

Hebei Mufei and Baoding Songli: Specialize in scalable 27U–42U cabinets and standardized 19-inch racks with optimized thermal management.

Applications

High temperature resistant communication cabinets are ideal for: Industrial plants and factories with extreme heat and dust exposure. Telecom towers and outdoor network nodes requiring weatherproof and vandal-resistant enclosures. Data centers and urban network hubs needing reliable temperature-controlled environments.

When sourcing wholesale, consider IP rating, cooling requirements, material durability, and supplier reputation to ensure long-term performance and cost efficiency. Engaging directly with manufacturers can also provide customized solutions and bulk pricing advantages.
