XM type lighting distribution box configuration

Overview

XM series indoor lighting distribution box is designed for AC 50Hz, 220V or 380V terminal circuits with rated current ≤100A. These technical parameters are essential for preventing electrical overloads and safeguarding both the system and users. The inclusion of these safety features aligns with. The Low Voltage Distribution Box is a compact and reliable solution for secondary power distribution in industrial, commercial, and residential applications. It is suitable for terminal distribution in public buildings, residential buildings, and home decoration, and can also be used in power supply locations such as building lighting. The XM series lighting and power dual-supply distribution boxes are available in three variants: universal type, outdoor type, and transparent window type. They can be designed for either surface-mounted wall installation or concealed recessed installation based on user requirements.
